

XAURON

Load Control Center

Under the name **XAURON** our company offers a comprehensive load management environment for electricity distribution companies. The XAURON allows you to manage tariff schemes and has a built-in advanced switching calendar system. It features a sophisticated graphical interface.

The XAURON has a multi-level architecture and can run within various configurations. A single central node base configuration is available as well as an advanced configuration for a backed-up solution with a high degree of redundancy. To connect the XAURON environment to the HDO technology, there is a Substations application module that enables you to integrate HDO transmitters control units of RS and DTU product lines. The XAURON can be integrated into the AMM infrastructure and in a collaboration with other XENERGY tools, it can provide network balancing.

Overview of selected features:

- ▶ Setting switching objects, a creation of switching plans:
- ▶ Support for various types of switching objects -ZPA II, Semagyr, Verscom and others
- ▶ A transparent AMM / SM infrastructure load control
- ▶ Creating and editing switching plans
- ▶ Checking sampling conditions
- ▶ NT switching and delivery statistics.

Load Management system configuration

- ▶ Defining system elements, parameterizing communication with transmitters
- ▶ Transmitter mutual configuration
- ▶ Changing the operating states of transmitters
- ▶ Object switching simulation support

System monitoring

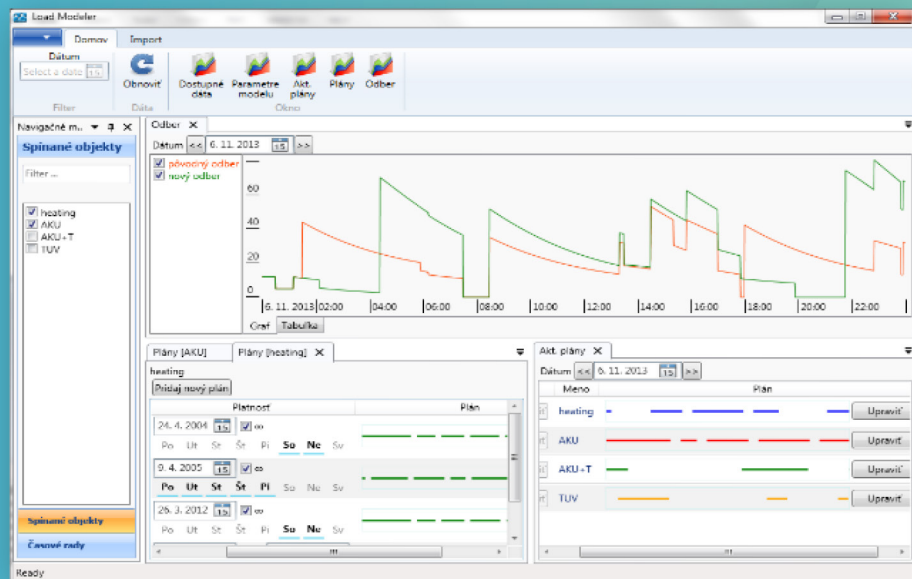

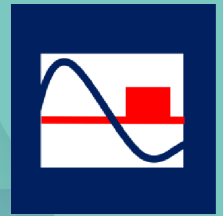

- ▶ A comprehensive overview of the HDO system
- ▶ Monitoring the status of transmitters, the progress of transmissions, the status of control signals, and the status of I/O variables
- ▶ Signal repetition, transmitter blocking and central control of control variables
- ▶ Detailed overview of system events, operating or fault conditions
- ▶ Support for user-defined alarms

A couple of words about us

We are a supplier of solutions for energy trading, energy and industry. Our solutions are aimed at energy suppliers, who provide their services to end clients, energy traders and energy management in industry. We have been on the market for 27 years and the Chartis report has recently included us in the elite club of **TOP 25 global technology players** on modern energy markets.

Operative interventions

- ▶ Simultaneous control of multiple objects
- ▶ Modifying the daily switching schedule operatively
- ▶ Control of variables status changes
- ▶ Checking the actual status of objects
- ▶ Forward / service broadcast

Get to know our other product lines as well

VARIOSTEP

- ▶ Monitoring of distribution substations
- ▶ Control of HDO transmitters
- ▶ Collection of data from energy meter
- ▶ Energy review in real time
- ▶ Flexibility control of consumption points
- ▶ Building energy control centres

XENERGIE

- ▶ Trading and business
- ▶ Data management and review
- ▶ Invoicing of end customers
- ▶ Group service to customers
- ▶ Predictions
- ▶ Optimization
